

Newater Visitor Centre 2019

On 10 May 2019, 11 colleagues spent their afternoon at the Newater Visitor Centre.

They were given a guided tour to learn about the origins, process and importance of Newater's role in Singapore's development journey.

It was a first time experience for many and had the chance to taste Newater straight off the production line. After 2 hours, they departed having picked up tips on saving water and appreciation of sustainable living concepts.

The Company hopes to continue and deepen the engagement of staff towards community learning and awareness so as to make meaningful contribution to society.
